

VIRTUAL CLINICS

When your child becomes sick at school, we have you covered. CoxHealth has partnered with your district to open a healthcare clinic right inside your child's school. This clinic will provide a safe, convenient, and quick way for your child to get the care they need. We will be able to connect you and your child to licensed Physicians or Nurse Practitioners using state of the art technology, and don't worry, we will not treat your child without your consent and participation during each visit. In addition, if a medication is prescribed and sent to the pharmacy of your choice, your child can start getting the treatment they need even sooner!

Your school's clinic will not replace your child's Primary Care Provider, but will provide a convenient option for treatment of minor illness. Having a Virtual Clinic at your school will result in, faster care, fewer missed school days for students and in turn, fewer missed work days for you.

We look forward to sharing more information about this great new service!

Commonly treated conditions:

- Strep Throat - Ear Infection - Sinus Infection -
Pink Eye - Rash - Stomach Flu - Head Lice - Bug Bites - Congestion

Virtual Visit Clinics are made possible by funding from the US Department of Agriculture and Children's Miracle Network Hospitals.
